

# seascan system

## The future of **GROUND DISCRIMINATION**

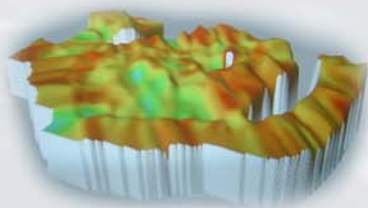

**seascan** - Established as a leader in the field of ground discrimination for commercial fishing vessels.

- Increase catch size
- Reduce costs
- Increase profits
- Reduce damage to gear
- Locate new fishing grounds
- Systems sold worldwide

The **seascan** 102 and 202 versions offer a range of benefits to the commercial user -

- Operation with existing vessel echosounders - *Avoid additional costs.*
- Operates with many existing plotter systems - *Just upgrade your existing software.*
- Provides both hardness and roughness details - *Vital for a full "picture" of the seabed.*
- Bi-Directional control from plotter PC - *Easy calibration and "fine tuning" for specific applications.*
- Diagnostics data string - *Easy identification and rectification of interface problems.*
